Forged vs. Stamped

There are many choices in professional cutlery. Choose the best option for your needs.

Forged knives are made from a single piece of steel. The metal is heated to a high temperature, rearranging its molecular structure which provides excellent strength. This results in a cutting edge that stays sharper longer and is easier to maintain. Forged knives have a bolster, the center support piece between the blade and the handle. This adds weight and balance to the knife and protection for your fingers. Forged knives also feature a full tang, the portion of the metal enclosed by the handle.

A die is loaded into a press to cut the knife shape from the steel blank. The blade is tempered, sharpened, and finished. This manufacturing process makes the knives more cost effective to produce. Stamped knives are usually thinner and lighter, offering an economic alternative to traditional forged cutlery.

Given their lighter characteristics, more downward force may be required compared to heavier forged blades. Because of their thinner profile, blades may also require regular maintenance more often than forged cutlery.

Knife Metals

Steel is the heart of the blade. The choice of blade materials is a huge component of knife performance. Heat treatment, blade geometry, edge grinding, and handle design also contribute to performance.

In deciding on the right knife, consider the following blade attributes:

- **Strength** – hardness/ability to take a load without permanently deforming
- **Wear Resistance** – ability to withstand surface abrasions
- **Edge Holding** – ability of a blade to hold an edge

Blades contain a variety of elements which contribute to the above attributes.

- **Carbon** – all steel contains carbon, which adds hardness to the blade. The more carbon, the harder the blade
- **Chromium** - adds hardness, but also allows the knife to hold an edge and contributes to rust-resistance
- **Vanadium** - allows a knife to retain an extra-sharp edge
- **Molybdenum** – contributes strength and wear-resistance
- **Manganese** - contributes strength and wear-resistance

Sharpening

Keep your edge. An array of options to keep cutlery sharp and operating at peak performance.

Sharpening vs. Honing

Sharpening a knife involves removing steel from the blade, exposing new steel, which is then polished and refined to the desired level. Honing does not remove steel from a blade, instead it “stands up” an edge that has rolled.

The edge of all knives will roll, making them seem dull. Some edges will roll faster due to steel hardness, alloy type, cutting surface and how the knife is used. The cutting edge needs to be realigned so it will cut with precision. The frequency a knife requires honing depends on edge retention, desired sharpness and cutting ability, cutting surface, blade use and honing knowledge.

Ceramic Honing Steels

High performance ceramic aligns the knife edge as it hones. Works quickly, taking less time to get the blade to peak condition. Super strong ceramic provides excellent durability. Ergonomic nylon handle with hand guard for safety and ring for easy storage.

Combination Sharpening Stones

Cutlery performs at peak levels with our sharpening stone system. Each stone contains a different grit level on each side. The Starter stone has coarser grit levels to repair damaged edges or blunt knives. The Finishing stone is made with finer grit levels for eliminating burrs on the knife edge.

- High-grade corundum construction for professional results
- Two grit levels for finer blade sharpness
- Rubberized base holder creates non-skid surface and prevents damage to work surface
- Packed in a color retail box

Sharpening Guide

Designed to train users to hold a knife at the proper angle when sharpening.

- Easiest and most accurate sharpening guide available
- Ideal sharpening angle for ultimate knife performance
- Ceramic inserts for longer life

Allergen Safety Products

Food Allergies are a growing public health concern and the number of people looking to reduce or eliminate gluten from their diets is increasing rapidly. When addressing these issues, it is essential customers feel foods are being handled safely and with a process that minimizes risk.

Mercer has designed and developed a comprehensive offering of knives and utensils which provides an easy to identify and implement system to help create special food allergen procedures to avoid cross-contamination when prepping, cooking, or serving food. The prominent purple color signals staff to maintain their dedicated use.

Chef Apparel

From our initial roots primarily selling high-quality cutlery to the foodservice community, Mercer has undergone a substantial evolution, becoming an innovative supplier to chefs. The products continue to transform problems and frustrations encountered by chefs into effective and efficient solutions.

Apparel is a natural product line for Mercer. Working side-by-side with chefs for more than 3 decades and leveraging that knowledge, our apparel offering can only come from being behind the line. There is tremendous attention to detail in the design of every product, the fabrics chosen, and the construction of the garments.

Material Overview

We have chosen fabrics we believe make sense to the chef community. They are lightweight and comfortable, yet mind the safety and laundering needs to be a truly, well-rounded piece of clothing for our profession.

The core products are 65/35 poly cotton twill blends that stand up to the demands of the job and hold up wash after wash. This super soft fabric has the feel of cotton with superior durability and color retention. An enhanced fabric blend is offered for our premium jackets for a more cottonesque feel with the key features of polyester to minimize shrinking and ironing. Relaxed-fit pants are made with 100% cotton yarn dye hounds tooth or black cotton twill for great fit and feel.

Attention to detail gives all garments a finished look.

Jackets

Every chef deserves a coat that makes them look and feel professional. Mercer offers a wide selection of chef coats to meet the needs of culinary professionals, from line cooks to executive chefs.

Renaissance

The next level in culinary attire. Elegance and design married with comfort and craftsmanship for the contemporary chef. Fashioned from fabrics that work with you, containing touches of detail that will set you apart.

Custom Embroidery

Mercer's state of the art equipment offers tremendous options in custom embroidery to give you the look you want. Our in-house embroidery department uses the latest technology and experience to create sensational looks.

Logos

For custom logos, files should be in .ai, .eps, .pdf, or .png format. Artwork should be submitted via e-mail to artwork@mercerculinary.com. Please make sure to specify the location on the garment the logo is to be sewn. The placement of embroidery is from the perspective of the person wearing the garment. i.e. Left Chest = Heart side.

Actual size of the logo on a garment depends on the shape and artwork supplied. Our professional in-house embroidery department will sew your logo to provide the best possible outcome on each garment. If more information is required, please call our Customer Service department to obtain further details.

Allow up to 5 business days to receive electronic logo approval artwork. Allow ten business days from approval of artwork for orders to ship from our Ronkonkoma, NY warehouse.

Text Space is limited to 20 characters per line (including spaces) for Unisex and Men's jackets, and 16 characters per line (including spaces) for Women's jackets.

Steps for a perfect fit

1. Stand up straight with arms hanging straight by sides.
2. Breathe normal. Wrap measuring tape under armpits around largest part of chest.

3. In the back, wrap tape measure across shoulder blades.
4. Tape measure should be snug, not tight.

5. Keep measuring tape parallel to the ground.
6. Add an inch to measurement if a looser fit is desired.

Our business comes from modest beginnings on Mercer Street in New York City in 1968 and was founded on the principles of delivering quality products, exceptional service and consistent value. For over 30 years we have strived to meet these goals every single day.

The foodservice industry is built on relationships. Integrity, character, and dependability are still valued and remain essential traits for all of our employees. Our growth has been exceptional these past 8 years, but that does not happen without you.

We thank you for your willingness to embrace our new products, working together to build new markets, and communicating about your needs. The future will bring continued growth and we are excited to share more new products, ideas, and challenges over the coming months.

Mercer is a dedicated supplier to the professional foodservice industry, with a staff committed to stay true to its roots in support of end-users, dealers, and distributors.

Packaging

Attractive Mercer Culinary packaging helps maximize sales. Multiple languages, features and benefits, easy to read bar codes and styling that can be displayed using standard peg hooks, make Mercer products an excellent choice for your showroom. Complete merchandising displays are also available. Contact your Mercer sales professional for more information.
